

Inclusion/Exclusion Criteria for Mind Matters IAPT Service

The Mind Matters IAPT Service supports people with common mental health conditions such as anxiety and depression. We offer short term CBT interventions for people with anxiety and depression and counselling for depression. Our average length of sessions at step 2 is 4 sessions and at step 3 is 6-8 sessions. We offer interventions online, telephone, group and individual sessions.

Inclusion:

- Depression, including antenatal and postnatal
- Generalised anxiety disorder
- Mixed depression and anxiety
- Panic disorder
- Obsessive-compulsive disorder (mild to moderate)
- Phobias (including social anxiety disorder or social phobia)
- Post-traumatic stress disorder (single event trauma only)
- Health anxiety (hypochondriasis)
- Adjustment disorders in adults with anxious mood
- Mild learning disability where anxiety or depression related symptomatology is present

Priority Cases:

- Perinatal (fast-tracked to access treatment within 14 days)
- Veterans (fast-tracked to access treatment within 14 days)

CQUINS:

We also aim to improve access to psychological therapies to the following groups;
