

The Triangle of Care

Information for people who use services and carers

Easy Read

The Triangle of Care

The Triangle of Care is about how service users, carers and professionals work together.

It is about:

- Better safety

- People getting better
- Wellbeing in mental health

- Including and supporting carers

The six principles of The Triangle of Care

1. We take account of the patient's carer from the start

2. Staff are trained to involve carers

3. We have rules about looking after people's information and when to share it

4. We have a Carer Liaison Worker whose job is to work with carers

5. We explain the service to carers

6. We have services that will support carers

Help for Carers

You can find out more about help for carers:

- By speaking to your Carer Liaison Worker

- At www.sabp.nhs.uk/carers

Carers Trust

The Carer's Trust runs the national Triangle of Care steering group.
